Subject: Oak Conservation

To: Christopher Caffee

We are writing to urge your adoption of proposed CEQA greenhouse gas amendments. We join California Oak Foundation in support of these amendments to help stave off the conversion of our native forests to non-forest use. . The impact of ripping out oaks in California ad hoc is taking a toll on our climate, habitat as well as the California landscape. Thank you for your attention to this important matter.
Karen and Leonardo Bowers, Albion, California
