Description of Silvicultural Categories.	
Silvicultural Category	Silvicultural Methods
Clearcut	Clearcut
Conversion	Conversion
Evenaged Management (no Clearcut)	Seed Tree Seed Step, Seed Tree Removal Step, Shelterwood Preparatory Step, Shelterwood Seed Step, Shelterwood Removal Step
Unevenaged Management	Selection, Group Selection, Transition
Intermediate Treatments	Commercial Thinning, Sanitation-Salvage
Special Prescriptions and Other Management	Special Treatment Areas, Rehabilitation of Understocked Areas, Fuelbreak/Defensible Space, Southern Subdistrict Special Harvesting, Variable Retention

For a more detailed description of silvicultural systems, see the California Forest Practice Rules, Title 14 California Code of Regulations, Article 3 Silvicultural Methods.

*Note that this data element has been corrected since the original May 27, 2014 version of the report.

**Note that this data element has been updated since the 2013 AB 1492 Report. This table uses the latest USDA Forest Service Forest Inventory and Analysis Program data, which is based on statistical sampling. Due primarily to changes in methods, the timberland acreage numbers have decreased from the analysis cycle data that were used in last year's report. Thus, the percentages in this table are not directly comparable to the similar table in last year's report.

Data Sources: CAL FIRE Forest Practice GIS database (silvicultural acres), USDA Forest Service Forest Inventory and Analysis Program 2002-2012 database (nonfederal timberland acreage), California Statistical Abstract (county acres). Note that counties that did not have timber harvests on nonfederal lands during this period are not included in the table.
