

Celebrate Earth Day 2022

Each April, Earth Day provides us opportunity to celebrate the planet we call home and recommit ourselves to better stewarding our lands and waters. California is leading the world to combat climate change, restore nature, and ensure outdoors for all. Join us this month as we celebrate progress and reflect on what's ahead for our shared work.

On April 22, celebrate with us and the National Wildlife Federation, Santa Monica Mountains Conservancy, and other partners as we break ground on the landmark Wallis Annenberg Wildlife Crossing. Together, we are building the largest wildlife crossing of its kind in the world. Join in-person or via livestream at www.savelacougars.org.

April Zoom Convenings:

- A Special Conversation with Dr. Katharine Hayhoe (Wednesday, April 13, 1:30-2:30 p.m. PST): Join us for a discussion with a world-renowned climate scientist, evangelical Christian, and best-selling author Katherine Hayhoe as we discuss how we find common ground to accelerate climate action.
- Hidden Heroes for the Environment (Tuesday, April 19, 12:30-1:30 p.m. PST): Join us to meet an inspiring set of grassroots leaders working in their communities to reduce pollution and build climate resilience.
