Natural Resources Agency staff persevered through an uncertain and difficult last year, navigating a global pandemic and catastrophic wildfire to make progress on our Agency’s mission to steward our state’s natural, cultural, and historic resources.

As we turn the page into 2021, we are positioned to advance key priorities, including doubling down on climate action, expanding environmental conservation to meet the Governor’s new “30 by 30” goal, expanding tribal engagement, and expanding equitable access for all. We are also leveraging lessons-learned from the pandemic to create a more dynamic, collaborative, and flexible workplace.

Join Secretary Crowfoot for a virtual town hall-styled event to learn more—and help inform—our Agency’s 2021 priorities. Please bring your questions and suggestions!

This event will be live-streamed on Zoom.
