

SECRETARY SPEAKER SERIES

BETWEEN 2 STATES: THE TAHOE SCIENCE ADVISORY COUNCIL

Join us to explore how the bi-state Tahoe Science Advisory Council is using collaborative, coordinated science to help protect Lake Tahoe.  

California and Nevada agencies work together to manage the Tahoe Basin, in close coordination with federal and local partners. Our management is guided by increasingly sophisticated science that expands our knowledge of natural systems, helps us predict future conditions, and shapes planning to respond to climate change and other stressors. Join us to hear how scientists and resource managers are working together to protect this globally unique place.

WEDNESDAY, MARCH 24, 2021 | 12:30 - 1:45 PM
