

Tribal Nature-Based Solutions Public Listening Session

Please join the California Natural Resources Agency (CNRA) for a public listening session on the draft grant guidelines for the new Tribal Nature-Based Solutions program. This new program has been designed to support California Native American tribes' multi-benefit nature-based solutions projects, including, but not limited to, ancestral land return, restoration projects, and climate resiliency planning. We welcome public comments on the draft grant program and invite members of the public to join either session listed below to share comments and questions about the new program. CNRA is currently consulting with California Native American tribes and has been in touch with tribal leaders.

The draft grant guidelines and associated materials can be found on our website at <https://resources.ca.gov/Initiatives/Tribalaffairs/Tribal-Nature-Based-Solutions-Program>

CNRA is also accepting written comments, which can be sent to tribalaffairs@resources.ca.gov by May 5, 2023.
