

**Water Storage Investment Program: Temperance Flat Reservoir Project Status Update**

**Introduction**

Temperance Flat Reservoir Authority (TFRA) will discuss the status of the Temperance Flat Reservoir Project with the Commission. Each quarter, applicants submit a report informing the Commission of project status as it relates to the Proposition 1 requirements. In recent quarterly reports, TFRA has indicated that it is evaluating its ability to achieve the prescribed schedule and would like to present the status of the project to the Commission.

**Background**

Through the WSIP, the California Water Commission will invest nearly \$2.6 billion in the public benefits of water storage projects, consistent with the requirements of Proposition 1 (the Water Quality, Supply, and Infrastructure Improvement Act of 2014), Chapter 8. In July 2018, the Commission made Maximum Conditional Eligibility Determinations, decisions that set the amount of Proposition 1 funding available to a given project, for eight projects that will create more than four million acre-feet of storage capacity. Since then, applicants have been working to complete the Proposition 1 requirements, which include obtaining permits and environmental documents, contracts for the administration of public benefits, and contracts for non-Proposition 1 funding before returning to the Commission for a final award hearing.

This agenda item implements Goal Four of the Commission's Strategic Plan, which calls on the Commission to carry out its statutory responsibilities for the Proposition 1 Water Storage Investment Program.

**Meeting Overview**

This is an informational item.
