

**Water Storage Investment Program: Early Funding Request**

**Introduction**

Sacramento Regional County Sanitation District (Regional San) will present its request for early funding under the Water Storage Investment Program (WSIP) for the Harvest Water Program project. The Commission will then decide whether to award funds for early funding. An early funding award cannot exceed five percent of a project's Maximum Conditional Eligible Determination (MCED). Early funding is a portion of the MCED, not in addition to the MCED. Based on the Harvest Water Program MCED of \$287,512,500, the early funding portion cannot exceed \$14,375,625..

At its August 2020 meeting, the Commission adopted emergency regulations to allow applicants that did not receive early funding in the initial application period another opportunity to apply. On August 31, 2020, the Office of Administrative Law approved the regulations. Early funding allows for reimbursement of funds related to the completion of environmental documentation and permitting for WSIP projects that received an MCED.

**Commission Decision**

Based on Regional San's presentation at the Commission meeting and public comment received before or at the meeting, the Commission can decide whether or not to award early funding to the project. If the Commission opts not to award early funding, the applicant will not be able to access early funding; the regulations do not allow the project to appeal the decision or reapply for early funding at a later time. If funding is awarded, the Commission must also decide on a funding amount, not to exceed \$14,375,625. If early funding is awarded, staff would then negotiate an early funding agreement that controls the use and disbursement of the funding.

**Background**

Through the WSIP, the California Water Commission will invest nearly \$2.6 billion in the public benefits of water storage projects, consistent with the requirements of Proposition 1 (the Water Quality, Supply, and Infrastructure Improvement Act of 2014), Chapter 8. In July 2018, the Commission made Maximum Conditional Eligibility Determinations, decisions that set the amount of Proposition 1 funding available to a given project, for eight projects that will create more than four million acre-feet of storage capacity. Since then, one applicant has withdrawn from the program and the Commission adjusted MCEDs by 2 percent for inflation. The seven remaining applicants are working to complete the Proposition 1 requirements, which include obtaining permits and environmental documents, contracts for the administration of public

benefits, and contracts for non-Proposition 1 funding, before returning to the Commission for a final award hearing.

This agenda item implements Goal Four of the Commission's Strategic Plan, which calls on the Commission to carry out its statutory responsibilities for the Proposition 1 Water Storage Investment Program.

**Meeting Overview**

At this meeting, Amy Young, the Commission's Water Storage Investment Program Manager, will introduce the decision before the Commission. Terrie Mitchell, Manager of Legislative and Regulatory Affairs and of Harvest Water for Regional San, will present their request for early funding.

This is an action item.
