Subject: Comment on Sites Reservoir

To: California Water Commission
Regarding: Sites Reservoir

The current plan for Sites Reservoir is dangerous for our future. Sites Reservoir will deplete the salmon population and taxpayer pocket books. If the project is allowed to move forward, more water will be taken from the Sacramento River than environmentally responsible. And the taxpayers will foot the bill of between \$3-\$3.5 billion. This project does not make sense. This is an expensive project, and Northern California water districts are trying to make money by selling it to the state of California. To make matters worse, the Metropolitan Water District of Southern California said it would require the Delta Conveyance Project (aka, Delta Tunnel or California Water Fix), which adds another \$15 billion on top of the original cost.

I am asking you to stop the Sites Reservoir.

Thank you.
