Natural Resources Agency Announces Awards for the Urban Greening Grant Program

SACRAMENTO – The California Natural Resources Agency (Agency) today announced \$76 million in funding for 39 green infrastructure projects through the state’s Urban Greening Program. Funded by Cap-and-Trade revenues, the grants support projects that aim to reduce greenhouse gases by sequestering carbon, decreasing energy consumption and reducing vehicle miles traveled. The projects also convert built environments into green spaces that improve air and water quality and provide opportunities for walking, biking and recreation.

“These innovative projects will improve the state’s urban areas and create green spaces that are more sustainable and enjoyable,” California Secretary for Natural Resources John Laird said. “Urban greening projects help meet our greenhouse gas emissions targets while contributing to healthy and vibrant communities.”

The Agency evaluated 143 applications and recommended funding for 39 projects identified below. Ninety-two percent of the funding was awarded to projects in disadvantaged communities as defined by SB 535 of 2012.

California’s Cap-and-Trade program, along with other state carbon reduction measures, ensures the state will meet its SB 32 target to reduce greenhouse gas emissions 40 percent below 1990 levels by 2030.
